Atrium Plana

– The hygienic radiant heating panel

Radiant heating and cooling

- Outstanding capacity – through patented laser-welding process
- Extremely low weight
- Easy to clean
- Available with hygienic back cover
- Easy to install and integrate into false ceilings
- Highly recyclable – only aluminium and copper

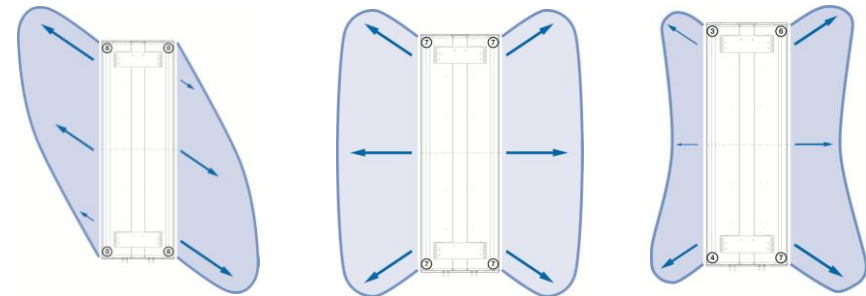

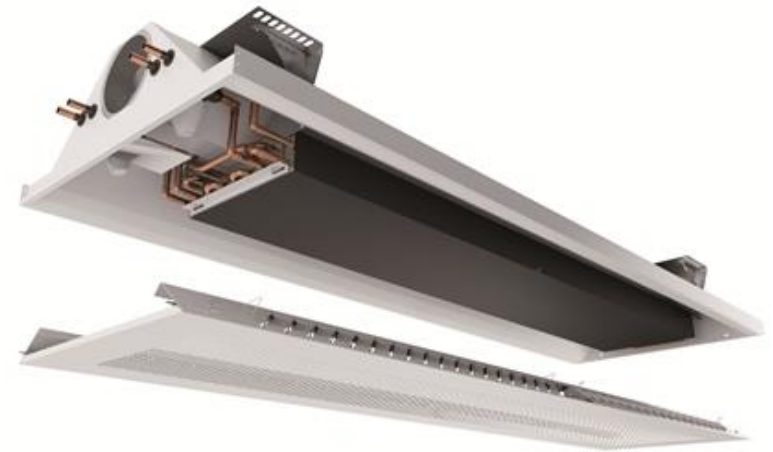

Premum & Premax

– Flexibility when it is needed!

- **Powerful and hygienic chilled beams!**
- **Flexible installation**
 - Available in many different dimensions to suit all applications
- **Many functions available**
 - Cooling, Supply air, heating, exhaust air and regulation
- **Flexibility – for you**
 - **JetCone**
Adjust air volume and distribution profile without any tools
Patent pending regulation system
 - **AirGuide**
Adjust and optimize air pattern without any tools
Ensure optimal distribution and eliminate draft
Patent pending regulation system
- **Easy to clean!**
 - Drop-down coil
Tilt down your coil and get access to everything
 - Cleaning hatch to access the duct system
 - Coated sheet metal ensures easy cleaning

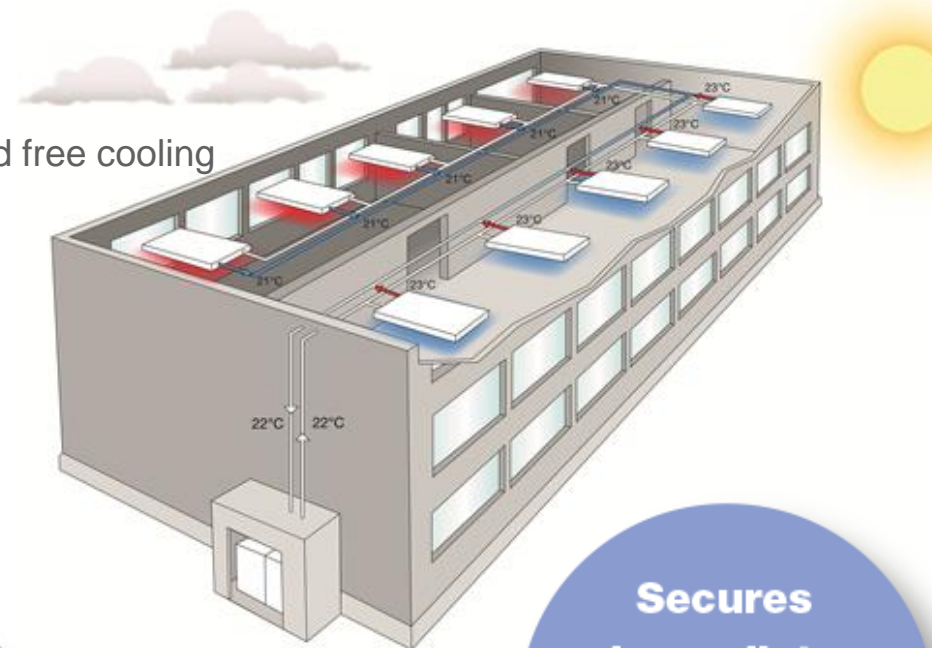

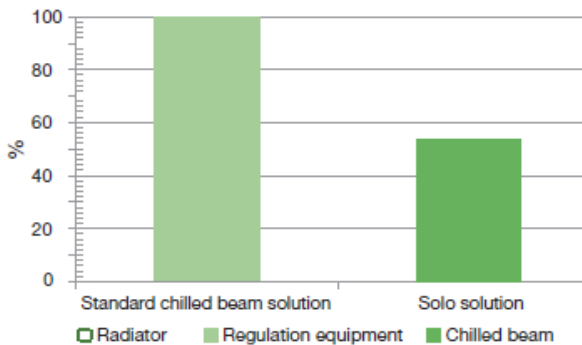

Lindab SOLO

- Simply the natural choice!

- High Temperature Cooling and Low Temperature Heating
- Secures immediate return on your investment!
- Save up to 45% cooling energy by transport of energy and free cooling
- Installation and investment savings
- Maintenance and running cost savings

Lindab SOLO - the first single pipe solution on the market...

**Secures
immediate
return on your
investment!**

Pascal

– Simplified VAV solution with full potential

- Maximum energy savings with a minimum number of standard components
- System control through the diffuser, easy, flexible and hygienic
- Variable pressure system
- Standard installation
- Easy commissioning
- Low fan pressure
- Demand control

Pascal – an energy saving solution

- 83 % savings compared to CAV
- 55 % savings compared to VAV with constant pressure
- 26 % savings compared to VAV with fan optimizer zone level

- Pascal the most simplified VAV solution on the market...
